

MIDI Gesture Plan

Input→Time Series of Images of Human Hands Moving

Create a setting page in the software to choose:

To play chromatically or all frequencies (like a theremin) or specific scales (A minor or in a pentatonic scale)

Instrument Sound Type

Create my "Brain" to recognise my hand's performing position

Divide my screen into 3 sections vertically

Assign each section with different tracks

Recognise my left hand opening and give a signal to the DAW to start recording

Then Recognize when I close my left hand to give a signal to the DAW to stop recording

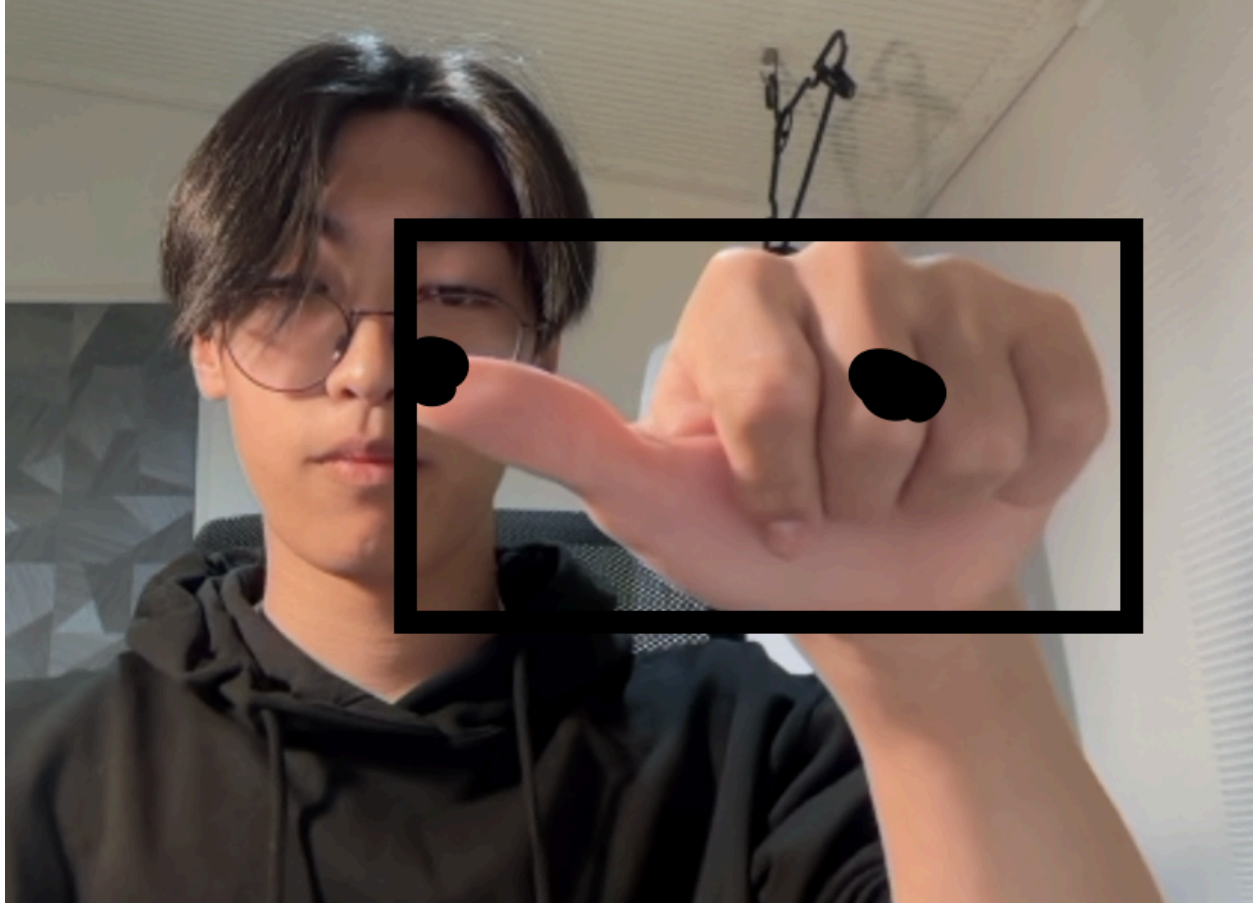

Recognise my hand pointing up and send a signal to the DAW to play that track (The track in the sections of which the hand appears)

Recognise this gesture to delete the track (The track in the sections of which the hand appears)

→Recognize my Right Hand, Middle finger knuckle and the tip of the thumb.

Convert that into a (x,y) coordinate

Camera→DAW

Left hand movement (Stop, play, start record, stop record)

Right hand thumb movement (Volume controller)

Camera→MIDI→DAW

Right hand y coordinate (Pitch Controller)

DAW→Speaker

Output→A Certain Pitch Sound From a Speaker
